**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

FIELD OF THE INVENTION

[0001] The present invention is directed to starch binder compositions, methods of forming the same, and products formed therefrom.

BACKGROUND

[0002] Gypsum board is a popular and conventional building material that is used in various types of building products such as, for example, walls, floors, and ceiling boards. Gypsum wallboard comprises a core material positioned between two porous sheet members, such as paperboard. The core material is typically formed from a plaster slurry that includes the combination of calcined gypsum, a reinforcing agent, a surfactant agent, a binder material, and water. The slurry is deposited and pressed between two continuous sheets of paper that are then allowed to take a "set" as the continuous sheet is conveyed to a cutter station where the board is cut into the desired lengths. The cut sheets may then be conveyed through drying kilns to remove excess moisture from the board and to enhance the migration of the soluble sugars (dextrins) in the acid modified starch to the paper/core interface to form a chemical bond.

[0003] Acid modified industrial grain sorghum, a thin boiling starch, is a known core binder material that is added to the plaster slurry in the manufacture of gypsum wallboard. When added to the slurry and pressed between the paperboard sheets, the soluble sugars of the modified sorghum migrate toward and partially into the sheets during the set and drying stage of manufacture, thereby promoting a chemical bond between the paper and core interface.
